Number of resident housing units: **Enter 0 if the facility does not have discrete housing units. DOJ PREA Working Group FAQ on the definition of a housing unit: How is a "housing unit" defined for the purposes of the PREA Standards? The question has been raised in particular as it relates to facilities that have adjacent or interconnected units. The most common concept of a housing unit is architectural. The generally agreed-upon definition is a space that is enclosed by physical barriers accessed through one or more doors of various types, including commercial-grade swing doors, steel sliding doors, interlocking sally port doors, etc. In addition to the primary entrance and exit, additional doors are often included to meet life safety codes. The unit contains sleeping space, sanitary facilities (including toilets, lavatories, and showers), and a dayroom or leisure space in differing configurations. Many facilities are designed with modules or pods clustered around a control room. This multiple-pod design provides the facility with certain staff efficiencies and economies of scale. At the same time, the design affords the flexibility to separately house residents of differing security levels, or who are grouped by some other operational or service scheme. Generally, the control room is enclosed by security glass, and in some cases, this allows residents to see into neighboring pods. However, observation from one unit to another is usually limited by angled site lines. In some cases, the facility has prevented this entirely by installing one-way glass. Both the architectural design and functional use of these multiple pods indicate that they are managed as distinct housing units.**	2

Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The Prison Rape Elimination Act (PREA) on-site audit of the KCI-Pensacola Residential Reentry Center in Pensacola, Florida was conducted on August 21-22, 2019 by Bryan K. Henson, a U.S. Department of Justice Certified PREA Auditor for adult facilities. Also, part of the audit team was Sheri Henson, a non-certified support staff member. During the on-site review, it was found that audit notices were posted throughout the facility. Pictures of the audit notices were submitted six weeks prior to the on-site review demonstrating the notices had been posted in both staff and residential areas. As of the date of this report, the Auditor has not received any correspondence by mail.

The Point of Contact established for KCI-Pensacola completed the *Pre-Audit Questionnaire* and it was provided to the Auditor along with supporting documents contained on a flash drive approximately one week prior to the on-site portion of the audit. Pre-audit preparation by the Auditor included a thorough review of all documentation and materials submitted by the facility along with the data included in the completed *Pre-Audit Questionnaire*. The documentation reviewed included agency policies, procedures, forms, education materials, training curriculum, organizational charts, and other PREA related materials that were provided to demonstrate compliance with the PREA standards.

The Auditor conducted an in-briefing with Director Bridgette Bridgeforth and PREA Coordinator Terracina (Connie) Stewart-Davis to discuss the audit schedule and an overview of the audit process. Immediately following this meeting, the Audit team toured the facility with Director Bridgeforth. All areas of the facility were toured to include housing, bathrooms, intake, administrative, day room, phone areas, and outside recreational areas. It should be noted that with the small size of the facility, and since this is a reentry center, many of the residents were either out of the facility during the work day in the community working or job searching. At the time of the tour, there were nine residents at the facility. During the site tour, the Audit team spoke informally with the staff and the residents on site. The auditor team made note of cross gender announcements, interaction between staff and residents, the placement of seven cameras at the facility and any potential blind areas. Immediately following the site tour and for the rest of day one, the Audit team interviewed both staff and residents. The interviews were conducted in a setting that provided both security and confidentiality. The audit team remained at the facility on the 4-12 shift to interview evening shift staff and residents that had been out to their jobs during the 8-4 shift. On day two, the audit team continued to interview more staff, to include staff on the 12-8 shift. The resident count on the first day of the audit

was 29, including three (3) on home detention that only report to the facility on a weekly basis unless prompted to report by the facility. The audit team interviewed a total of 13 residents, and all were random interviews with no targeted resident interviews as was reported by the facility and the audit team found no evidence of any residents that meet the criteria for a targeted interview. In addition, the auditor interviewed eighteen (18) staff, including eight (8) specialized staff, 10 random staff (representing all shifts and various posts), the facility director, agency head designee, and the PREA coordinator. This included every staff member that was at the facility during the on-site review, to include two (2) staff that came to the facility just for the interview. All other assigned staff were not available to be interviewed. The Auditor also made contact with The Lakeview Rape Crisis and Recovery Center to discuss the interventions and support provided as Victim Advocates.

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

KCI-Pensacola Residential Reentry Center located in Pensacola, Florida and serves as a private, community custody half-way house for federal Bureau of Prisons (BOP) inmates. All of these residents are within months to reenter society with their average stay at six months. Residents at Pensacola are seeking adequate home and job placements to be approved by BOP. The facility houses both male and female, with two open dormitory units. One male dorm and one female dorm. The facility was designed for a capacity of thirty-six (36) residents and housed twenty-six (26) on the first day of the audit, not including three residents assigned to the facility but were on home detention. Home detention residents do not stay overnight, and only report to the facility once a week or as requested by the facility.

Summary of Audit Findings

The summary should include the number and list of standards exceeded, number of standards met, and number and list of standards not met.

1. Documents: (Policies, directives, forms, files, records, etc)
   a. Staffing Plan
   b. Staffing Plan Annual Review
2. Interviews:
   a. Director
   b. PREA Coordinator

During the pre-audit review, the facility had submitted a Staffing Plan that included the staffing schedule with the number of facility positions to include minimum staffing numbers on each shift with a requirement to have one male and one female on each shift. In determining adequate staff, the Plan documented considerations were given to the required components listed in section (a) of the standard. Also, the Director was able to describe how each of the required components were considered when determining adequate staffing levels as well as video monitoring. The facility indicated through the questionnaire as well as interviews of the Director that they had zero occurrences where they had deviated from the staffing requirements. Interviews of the Director indicated the minimum staffing levels are monitoring through documented staff schedules and checked daily. The Director added that adherence to the staffing plan is accomplished through ensuring minimum numbers are maintained by replacing any staff from call-ins with same gender staff being called in to fill the shortage. If someone cannot be called in to fill a vacancy, the person currently on post will be required to work overtime or the Director or other supervisor would fill the post on shift. Documentation was provided of the annual assessment of staffing plan with PREA coordinator input and the assessment documented whether adjustments were needed to (1) The Staffing Plan; (2) Prevailing Staffing patterns; (3) The facilities deployment of video monitoring; and (4) Other resources available to ensure adequate staffing levels. This was supported by the interview with the PREA Coordinator.

Auditor Overall Compliance Determination

☐ **Exceeds Standard** (*Substantially exceeds requirement of standards*)

☒ **Meets Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)

☐ **Does Not Meet Standard** (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

1. Documents: (Policies, directives, forms, files, records, etc)
   a. KCI Policy Chapter 11 Searches and Contraband
   b. KCI PREA Policy
2. Interviews:
   a. Random Sample of Staff
   b. Random Sample of Residents

The KCI-Chapter 11 Searches and Contraband policy prohibits cross gender pat downs, strip and body cavity searches. There was no evidence through documentation or interviews that any cross-gender searches had occurred to include any cross-gender pat down searches of female residents. This was supported by interviews with random staff and random residents. The agency PREA Policy enables all residents to shower, perform bodily functions, and change clothing in private. The facility tour supported showers that allowed such to occur with individual showers and curtains for each shower. The search policy also required staff of opposite gender to announce themselves when entering each housing area. This practice was observed while

on-site. Interviews of random residents supports the above policy is followed regarding ability to perform such functions in private and cross-gender announcements. The search policy also prohibits searches for sole purpose of determining the resident's genital status. Interviews of random staff support they comply with policy. After a review of staff training files and the pre-audit documentation, no documentation was found to support that security staff are being trained on how to conduct searches of transgender and intersex residents in a professional and respectful manner, and in the least intrusive manner possible, consistent with security needs. The interviews of random staff support that staff do receive training in how to pat down both genders; however, regarding training in how to conduct searches of transgender and intersex residents, 5 of the 10 staff interviewed indicated this topic was not covered during the training. The other five interviewed indicated there was some discussion of transgenders in their search training. Although responses were inconsistent as to how these searches would be conducted, many indicated they would just wand them and not conduct a physical pat down search. Based upon no documentation was provided to support the training had been conducted as well as the inconsistent results of staff interviews, section (f) is found to be non-compliant. Through a Corrective Action Plan, the agency has adopted the training curriculum developed by The Moss Group "Guidance in Cross Gender and Transgender Pat Searches". The facility has used the new curriculum to train all security monitors at KCI-Pensacola. Training acknowledgement forms from the training were submitted to the auditor to demonstrate that security staff have received the training. Based upon this information, the standard is now found to be compliant.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. 2. Interviews:
   a. PREA Coordinator

The agency/facility does not conduct investigations related to allegations of sexual abuse. Administrative investigations are conducted by Federal Bureau of Prisons. Criminal investigations are conducted by Escambia County Sheriff Department. KCI-Pensacola PREA policy states that when appropriate the facility director shall request forensic exams be conducted by SAFE/SANE and efforts to provided SAFE/SANE shall be documented. The facility offers forensic exams without cost when required through Women's and Children Hospital as was verified through the hospital emergency room. No incidents have occurred that required sending a resident out for a forensic exam. Interviews with the PREA Coordinator support that the facility provides victim advocate services available through Lakeview Center Rape Crisis/Trauma Recovery Program. The facility provided an MOU that has been established between Lakeview Center Inc. and KCI-Pensacola for Victim Advocates Services. Contact was made with Lakeview Center Rape Crisis/Trauma Recovery Program and verified they are supporting KCI-Pensacola and have advocates available 24/7. They also indicated they would accompany victims through the exam and investigatory process. At the time of the on-site review, there was no documentation provided by the facility indicating they had requested the investigative entities/agencies that conduct investigations of sexual abuse to follow the requirements of sections (a) through (e) of this standard. KCI-Pensacola PREA policy states all employees shall receive annual training in the required components listed in section (a) of the PREA standard. After a review of the curriculum provided by the agency, all items except item (10) of section (a) were found in the curriculum. had completed and signed acknowledgements that they understood the training received. Interviews of random staff concerning PREA training indicated they had limited knowledge of the training curriculum provided. Through a Corrective Action Plan, the agency has adopted the employee training curriculum that was developed by The Moss Group that contained all required components, and added local information to applicable areas, then retrained all the staff at KCI-Pensacola. Training acknowledgement forms from the re-training were submitted to the auditor to demonstrate that all staff have received, and understood the training they received. Interviews of random resident's support information is distributed to residents upon intake. Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

1. Documents: (Policies, directives, forms, files, records, etc)
   a. KCI-Pensacola PREA Policy
   b. Risk Screening Tool
   c. Resident Files
2. Interviews:
   a. Staff performing Risk Assessment

b. Random residents
c. PREA Coordinator

KCI PREA Policy states offender shall be assessed during intake screening within 24 hours of arrival at a Keeton Corrections Inc. facility. A review of resident files found that the initial screening was completed within 24 hours of arriving at the facility in four of the six files reviewed. Given the standard requirement is 72 hours, substantial compliance is met for section (b). A review of the screening tool found that it screened for both victimization and abusiveness and the tool was in a yes/no format and had a scoring guide or range scale for yes/no responses which supports the objectivity of the screening tool for both victimization and abusiveness. The resident files reviewed, along with interviews of random residents and staff conducting risk screening determined that the facility was not conducting re-assessments within a 30-day period; therefore, finding section (f) of this standard non-compliant. Through a Corrective Action Plan, the facility revised the process to include a tracking log to help ensure reassessments are completed within 30 days of arrival. The facility provided documentation of reassessments samples over a three-month period. These samples were reviewed by the auditor and substantial compliance was obtained for this section of the standard. The interviews of staff performing risk assessments supported that an assessment would be conducted for any reason where it may affect the risk level. Interviews with staff performing risk assessment also support residents do not receive any disciplinary action for not responding to questions in the assessment. Interviews with the PREA Coordinator support that the facility does have appropriate controls on the responses to questions asked during the assessments. The assessments are kept in a file that is limited to only staff conducting assessments, and the electronic version in their system requires certain security access to pull up the questionnaire. This was tested on the staff monitor's computer and they were unable to access it.

115.242 (a)

- When making housing or other program assignments for transgender or intersex residents, does the agency consider on a case-by-case basis whether a placement would ensure the resident's health and safety, and whether a placement would present management or security problems? ☒ Yes ☐ No

115.242 (d)

1. Documents: (Policies, directives, forms, files, records, etc)
   a. KCI-Pensacola PREA Policy

2. Interviews:
   a. Staff performing risk assessments
   b. PREA Coordinator

KCI-PREA Policy states that information resulting from the risk assessment is used to inform decisions regarding housing, beds, work, education, and program assignments. Interviews with staff performing risk assessments and the PREA Coordinator indicated while KCI-Pensacola does not have educational and/or program assignments, and residents mainly work outside the facility as a part of the reentry process, the risk assessment information is used to inform housing by placing any high-risk victims toward the front of the dorm and any high-risk abusers would be placed with adequate distance separating them from the high-risk victims. It should be noted that staff indicated that residents do have in house chore assignments and the risk information is considered in making these assignments in that each of the chores assigned are in areas of close supervision either by video monitoring or staff supervision. The facility reports no high-risk residents currently at the facility. The interviews with the PREA Coordinator did support that the facility would give serious consideration to transgender/intersex own views and make individualized decisions when looking at the safety of all residents and would consider on a case-by-case basis the housing of transgender or intersex residents. The showers set up to allow separate showering for all residents. They do not house LGBTI in dedicated wings. Based upon the above, this standard is found compliant.

   a. KCI-Pensacola PREA Policy
   b. Resident handbook
   c. PREA Pamphlet
2. Interviews:
   a. Random staff
   b. Random residents

KCI-PREA Policy, the resident handbook and PREA pamphlet provides multiple internal ways for residents to report incidents, i.e. any staff member, grievance forms, contact the corporate office directly by phone or mail. Residents may also report incidents outside of the agency by contacting the Bureau of Prisons (BOP). The address and a number are posted on bulletin boards and in pamphlets available in the dayroom. Residents may also call 911 to outside law enforcement at no cost from a resident phone that can be checked out at the monitor's station and used anywhere in the dayroom that allows them to remain anonymous if requested. Residents may also carry personal cell phones. Interviews of random residents supported the methods mentioned above. Random staff interviews support that staff are required to accept reports in any form and document such reports. Also, that staff have methods in place to privately report incidents to include the same outside methods as residents.

(N/A if agency is exempt from this standard.) ☒ Yes ☐ No ☐ NA

   a. KCI 15.2 Emergency Grievance Alleging Substantial Risk of Imminent Sexual Abuse
   b. Resident handbook

2. Interviews:
   a. None

The resident handbook outlines the grievance process for residents and does not prohibit residents from filing administrative remedies for allegations of sexual abuse and supports standard provisions for sexual abuse grievances. KCI-Pensacola grievance policy describes a procedure for filing an emergency grievance alleging that a resident was subject to substantial risk of imminent sexual abuse. It states the person receiving the grievance shall immediately forward it to the Director and the Director must take immediate action to protect the resident. The process ensures an initial response within 48 hours and a final decision within 5 calendar days. The initial and final decision must document the determination whether the resident is in substantial risk of imminent sexual abuse and the action taken in response to the emergency grievance. The facility reported there were no grievances filed regarding allegations of sexual abuse during this audit period. The above policy also supported no disciplinary action for residents filing grievances in good faith.

   b. Random residents

KCI-Pensacola PREA Policy requires the facility to offer residents access to victim advocate services. Residents at KCI-Pensacola are provided contact information to include a toll-free hotline number as was posted. Interviews with the PREA Coordinator support there is an established MOU, which was reviewed by the auditor. All but one of the residents interviewed understood that victim advocates services are available noting the contact number is posted. At the time of the on-site review, related to section (b), there was no documentation provided to the auditor that indicated residents had been informed of extent of communication monitoring by facility and the extent of mandatory reporting required by the Victim Advocate Center. Through a Corrective Action Plan, the facility developed and posted a Victim Advocate flyer that documented the extent of communication monitoring by the facility and the extent of mandatory reporting required by the Victim Advocate Center. The flyer was also provided to the auditor who verified the required information is on the flyer. The standard is now found to be compliant. Recommend the facility add the flyer information to the Resident Handbook.

KCI-Pensacola PREA policy indicates they have established policy to protect residents and staff from retaliation as required in each section of this standard. There were no incidents/allegations within the past 12 months that would have prompted monitoring responsibilities. The Director had awareness of different measures to employ in monitoring for retaliation as well as ensuring an investigation if retaliation occurs. The audit team interviewed the staff member designated by the agency/facility to monitor for retaliation which reflected that she had not conducted any monitoring for retaliation, nor did she have any knowledge of the steps included in the monitoring for retaliation plan established by the agency/facility. The facility has a form that is to be used to document such monitoring responsibilities. Although the facility has a policy that outlines each of the required steps for compliance in monitoring for retaliation, it is concerning to the auditor that the designated staff member indicated no knowledge of their designation/responsibility to conduct such monitoring when an allegation occurs. **Recommend providing training to the individual designated to monitor for retaliation to include a review of the PREA standard, the form developed for monitoring to ensure the staff member has adequate awareness in order to have the ability to complete their duties of monitoring when allegations occur**.

   a. KCI-Pensacola PREA Policy
   b. Resident handbook
2. Interviews:
   a. Director

The facility reports no occurrences that would have required such disciplinary process. The resident handbook contained a formal disciplinary process that would follow administrative findings of resident on resident sexual abuse, and is in the most severe category for sexual assault on another resident. KCI-Pensacola PREA policy states if an offender has pending disciplinary sanctions for an alleged offender on offender sexual abuse, consideration shall be given to whether the offender's mental disabilities or mental illness contributed to his or her behavior when determining what level of sanction, if any, will be imposed. This language supports section (c). Also, the responses provided by the Director in formal interviews support compliance of the standard.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. 1. Documents: (Policies, directives, forms, files, records, etc)
   a. PREA Annual Reports
   b. Agency Website
2. Interviews:
   a. PREA Coordinator
   b. Agency Head Designee

Interviews with the Agency Head Designee provided details on how data is used to assess and improve in all areas of PREA effectiveness. Interviews of the PREA Coordinator support that the data is reviewed for this purpose. The interviews also indicated that annual reports are approved by the CEO of KCI. However, at the time of the on-site review, the agency/facility did not produce an annual report to document a review of data collected for KCI-Pensacola and assesses its effectiveness of sexual abuse prevention. With no annual report, the agency is unable to compare yearly data, or demonstrate the reports are approval by the agency head or posted such on the agency website. Through a Corrective Action Plan, the agency was able to review the aggregated data collected as demonstrated by including this data in the development of the 2018 PREA annual report. The 2018 PREA annual report was submitted and reviewed by the auditor. The report contained a section where the agency identified problem areas, on-going corrective action, as well as a comparison of data between the current year's data to the previous year's data. It contained an assessment of the agency's progress and the goals for the upcoming year for the agency. The report was signed by the agency president, approving the report and, along with the 2017 annual report, had been posted on the agency website for public viewing. Based upon this information, the standard is now found to be compliant.

115.289 (c)

- Does the agency remove all personal identifiers before making aggregated sexual abuse data publicly available? ☒ Yes ☐ No

115.289 (d)

   a. KCI-Pensacola PREA Policy
   b. PREA Annual Reports
   c. Agency Website
2. Interviews:
   a. PREA Coordinator

The KCI-Pensacola PREA policy states all data collected shall be securely retained. Interviews of the PREA Coordinator support that all data collected is secured in the corporate office of the PREA Coordinator and maintained for at least 10 years in accordance with records retention. At the time of the on-site review, the aggregated data from all KCI facilities to include KCI-Pensacola was not made available to the public through the KCI website. Through a Corrective Action Plan, the agency posted both the 2017 and 2018 PREA Annual Report with the aggregated data on the agency website making it accessible to the public. A review of the annual reports posted demonstrated that no personal identifiers were included in those reports. Based upon this information, the standard is now found to be compliant.
