Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The Prison Rape Elimination Act (PREA) on-site audit of the Tallahassee Residential Reentry Center (TRRC) in Tallahassee, Florida was conducted on November 8-9, 2017 by Bryan K. Henson, a U.S. Department of Justice Certified PREA Auditor for adult facilities. During the onsite review, it was found that audit notices were posted throughout the facility. As of the date of this report, the Auditor has not received any correspondence or mail. The Point of Contact established for TRRC completed the Pre-Audit Questionnaire and it was provided to the Auditor along with supporting documents contained on a flash drive approximately 2 weeks prior to the on-site portion of the audit. Pre-audit preparation by the Auditor included a thorough review of all documentation and materials submitted by the facility along with the data included in the completed Pre-Audit Questionnaire. The documentation reviewed included agency policies, procedures, forms, education materials, training curriculum, organizational charts, and other PREA related materials that were provided to demonstrate compliance with the PREA standards. This review prompted a series of guestions and request for additional supporting documentation submitted in writing to the POC/ PREA Coordinator. Answers to a few of the questions were submitted back with some additional supporting documentation. Due to receiving this information close to the on-site portion, the additional documentation was reviewed while on-site.

The Auditor conducted an in-briefing with the Director Jessica Swatts-Gaines and PREA Coordinator Terracina (Connie) Stewart-Davis to discuss the audit schedule and an overview of the process. Immediately following this meeting, the Auditor toured the facility with Director Gaines. All areas of the facility were toured to include housing, bathroom, intake, administrative, day rooms, phone areas, and outside recreational areas. It should be noted that with the small size of the facility, and since this is a reentry center, many of the residents were either out of the facility in the community working or job searching. At the time of the tour, there were 3 residents at the facility. The Auditor spoke informally with the staff and the 3 residents on site. The auditor made note of cross gender announcements, interaction between staff and residents, the placement of 8 cameras at the facility and any potential blind areas. Immediately following the tour and for the rest of day one, the Auditor interviewed both staff and residents. The interviews were conducted in a staff member's office that had a window. This allowed for confidentiality, yet staff could ensure a secure area. The auditor remained at the facility on the 4-12 shift to interview evening shift staff and residents that had been out to

their jobs during the 8-4 shift. On day two, the auditor continued to interview more staff and residents by coming in early on the 12-8 shift to interview the night shift staff and other residents that leave the facility early to go to their jobs. The resident count on the first day of the audit was sixteen (16), including five (5) on home detention that only report to the facility on a weekly basis unless prompted to report by the facility. The auditor interviewed a total of 11 residents, and all were random interviews with no specialized interviews as was reported by the facility and the auditor found no evidence of any residents that meet the criteria for a specialized interview. In addition, the auditor interviewed nineteen (19) staff, including seven (7) specialized staff, 10 random staff (representing all shifts and various posts), the facility director, agency head designee, and the PREA coordinator. This included every staff member that was at the facility during the on-site review. The Auditor also made contact with The Refuge House to discuss the interventions and support provided as Victim Advocates.

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

The Tallahassee Residential Reentry Center (TRRC) located in Tallahassee, Florida and serves as a private, community custody half-way house for federal Bureau of Prisons (BOP) inmates. All of these residents are within months to reenter society with their average stay at six (6) months, many just waiting for their home and job placements to be approved. The facility houses both male and female, with 3 open dormitory units. One male dorm and two female dorms. One of the female dorms housed a program designed for pregnant mothers, although it was vacant at the time of the audit. The facility was designed for a capacity of thirty-three (33) and housed 16 on the first day of the audit, and five (5) of them were out on home detention.

Summary of Audit Findings

The summary should include the number of standards exceeded, number of standards met, and number of standards not met, along with a list of each of the standards in each category. If relevant, provide a summarized description of the corrective action plan, including deficiencies observed, recommendations made, actions taken by the agency, relevant timelines, and methods used by the auditor to reassess compliance.

Auditor Note: No standard should be found to be "Not Applicable" or "NA". A compliance determination must be made for each standard.

nstructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

During the pre-audit review, the facility had submitted a Scope of Work and Technical Proposal that requires a certain level of staffing. A review of these documents revealed they do not document that they considered items 1-4 within the standard in order to calculate adequate staffing levels and determine the need for video monitoring. The facility indicated through the questionnaire as well as interviews that they had zero occurrences where they had deviated from the SOW staffing requirements. The minimum staffing levels are checked daily by the Director. Documentation was provided of annual assessment of staffing plan with PREA coordinator input but the assessment failed to document whether adjustments were needed to items 1-4 in section (c). Through a Corrective Action Plan (CAP), the facility developed a separate revised Staffing Plan that included the SOW (Personnel Section) and Technical Proposal, but also included the staff schedule, and minimum staffing, and map of current facility video monitoring, and documented that consideration was given to (1) the physical layout of the facility;)2) The composition of the resident population; The prevalence of substantiated and unsubstantiated incidents of sexual abuse and (4) any other relevant factors in determining adequate staffing levels. Once the staffing Plan was revised, the facility conducted a written updated assessment of the revised staffing plan to determine if adjustments were needed to (1) The Staffing Plan; (2) Prevailing Staffing patterns; (3) The facilities deployment of video monitoring; and (4) Other resources available to ensure adequate staffing levels. After a review of the completed CAP, this standard was found to be compliant.

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

The agency search policy prohibits cross gender pat downs, strip and body cavity searches. There was no evidence through documentation or interviews that any cross-gender searches had occurred. The agency PREA Policy enables all residents to shower, perform bodily functions, and change clothing in private. The facility tour supported showers that allowed such to

occur with individual showers and curtains for each shower. Their search policy also required staff of opposite gender to announce themselves when entering each housing area. This practice was observed while on-site. Reviewed training records and curriculum that supports that staff are being trained in how to conduct cross gender pat downs and searches of transgender and intersex residents. Interviews from both staff and residents support all of the above noted information.

Information is available in multiple formats to ensure residents with disabilities have equal opportunities to participate and benefit from the PREA educational information. All PREA Educational videos have closed captioning for multiple languages and audio is available for those with vison issues. The information is read to those who may not be able to read. TRRC does not rely on resident interpreters. The facility has a staff member that may serve as an interpreter. Recommend they seek a provider to conduct interpretive services in case the staff member is not available. At the time of the on-site visit, the facility reported no limited English proficient residents were housed.

Auditor Overall Compliance Determination Exceeds Standard (Substantially exceeds requirement of standards) \boxtimes Meets Standard (Substantial compliance; complies in all material ways with the standard for the relevant review period) **Does Not Meet Standard** (Requires Corrective Action) **Instructions for Overall Compliance Determination Narrative** The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility. The facility does not hire or promote individuals who have engaged or been convicted of sexual abuse/assault in a confinement setting or in the community, or who have been civilly adjudicated of such an incident. While on-site, it was determined that the facility/agency had failed to have all pre-hires and those considered for promotions, and during any interviews conducted for annual performance evaluation to answer the 3 questions in section (a) regarding misconduct. Through a CAP, the agency/facility has revised the job application to include the three (3) questions from section (a) regarding misconduct. There were no new hires or promotions completed during the CAP. A separate form was developed that includes the three (3) questions to be completed at the time each staff member is interviewed for their annual performance evaluation. The documentation nor the interviews supported that the facility was considering incidents of sexual harassments in determining whether to hire or promote anyone. Through a CAP the agency/facility revised their PREA policy to require that any incident of sexual harassment known to the agency/facility shall be considered prior to hire or promotion of a staff member, or prior to the enlistment of any contractor who may have contact with residents. The PC provided documentation/verification that all HR staff have been trained on the revised policy. The facility reports there are no contractors working at the facility. Reviewed a sampling of files to verify pre-hires have background checks. Potential employees undergo a criminal background check. The Human Resources staff confirmed that upon request from another institution, information on substantiated allegations of sexual abuse and harassment involving a former employee would be provided. It was reported that Bureau of Prison conducts background checks annually. A random check of staff that had been at the facility for more than 5 years indicated those checks are conducted. Based upon the above, I find this standard in compliance. Facility PREA policy ensures all allegations of sexual abuse and sexual harassment are referred for investigation, to include those with the legal authority to conduct criminal investigations and document such referrals through an Unusual Occurrence Report (UOR). At the time of the on-site review, the Investigative policy was not published on the agency website, nor did the solicy describe the responsibilities of both the agency and Leon County Sheriff's office. Through a CAP the facility revised PREA policy in the investigations section to include who is charged with responsibility of administrative and criminal investigations and describe the responsibilities of both the agency (TRRC) and the investigative entity(LCSO). The revised Investigation section) policy has been placed on the agency website under the PREA tab. Based upon this corrective action, the standard is in compliance.

The facility reports they have no contractors or volunteers and have had none in the past 12 months. The facility was unable to provide a plan or training curriculum for future volunteers and contractors that would notify them of the agency/facilities zero tolerance policy regarding sexual abuse and sexual harassment and informed how to report such incidents. Through a CAP, the facility revised the Training and Volunteer Coordination policy (2.9) to include that all volunteers shall be trained in the agency/facilities zero tolerance policy regarding sexual abuse and sexual harassment and be informed how to report such incidents. Also, the facility revised the Volunteer Orientation Packet to include that all volunteers shall be aware of the agency/facilities zero tolerance policy regarding sexual abuse and sexual harassment, and shall report any knowledge, suspicion, or information regarding an incident of sexual abuse or sexual harassment. The revision provided included specific methods the volunteers and contractors may use to report such. This corrective action brings this standard in compliance.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

A review of the risk screening process found that the facility staff were screening all resident initially within 24 hours of arriving at the facility. A review of the screening tool found that the tool was in a yes/no format and had no scoring guide or range scale for yes/no responses; therefore, there was no objective way to determine risk level. The tool also had only one section to score both victimization and abusiveness, not a section to score them individually, so for multiple yes responses, the screener had no objective method to determine which area may be high risk (victimization or abusiveness). Interview results indicated screeners had never had a high-risk resident and was unsure what would determine that result. Although the tool touched on every item required in section (d), it was difficult to assess which item applied to measuring risk of victimization or abusiveness. The auditor was presented with a second tool that had previously been used as a hard copy tool but discontinued when the current tool was started with a new computer system for the agency. Through a CAP the facility revised the screening tool to one that has all required criteria listed in sections (d) and (e) and measures victimization and abusiveness separately. The revised tool also included a scoring scale that provided objectivity. The facility provided documentation that the current population was reassessed with the revised tool. During the on-site review, it was also determined that the facility was not conducting reassessments within a 30-day period. Through a CAP, using the revised screening tool, the facility over a three (3) month period provided once a month the initial assessment (conducted with 24 hours of arrival) and corresponding re-assessment (conducted within 30 days of arrival) for 3 separate residents. This documentation demonstrated that the facility was conducting the re-assessments and doing so in a timely manner. The facility also provided spreadsheet use by the screening staff that tracks those residents requiring re-screening within 30 days. The interviews supported that an assessment would be conducted for any reason where it may affect the risk level. Residents do not receive any disciplinary action for not responding to questions in the assessment. The facility does have appropriate controls on the responses to questions asked during the assessments. The assessments are kept in a file that is limited to only staff conducting assessments, and the electronic version in their system requires certain security access to pull up the questionnaire. This was tested on the staff monitor's computer and they were unable to access it. Based upon the above, this standard is found compliant.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Based upon the review of the screening process and responses from interviews, the facility had reported that they had not had any residents that were determined to be high risk for victimization or abusiveness; therefore, had not been able to use the screening information to inform such assignments to apply the goal of separation to any residents. During the interviews, staff were asked about what steps would be taken if through screening, they found both high risk victims and high-risk abusers. The responses indicated the facility did not have a

process/plan to ensure the screening information was used to inform housing, bed, work, education, and program assignments with the goal of keeping separate those residents that are high risk victims from those residents that are high risk abusers. Because TRRC is such a small facility that enables close supervision within the facility, and as a Re-Entry facility, all residents work outside of the facility, and that they have no educational or programming assignments without direct supervision, this plan should specifically address housing decisions. Through a CAP, the facility revised the PREA policy to detail a written plan that ensures the information from the risk screening would be properly used to inform the appropriate decisions as outlined in this standard to ensure the safety of all residents. The interviews did support that the facility would give serious consideration to their own views and make individualized decisions when looking at the safety of transgender/intersex residents and would consider on a case-by-case basis the housing of transgender or intersex residents. The showers set up to allow separate showering for all residents. They do not house LGBTI in dedicated wings. Base upon the above, this standard is found compliant.

This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.
A review of the facility PREA policy indicates they have established policy to protect residents and staff from retaliation as required in this standard. At the time of the on-site review, there was no staff member or department designated by the agency/facility to monitor for retaliation. It should be noted that the facility reports no allegations have been received in past 12 months that would have required monitoring. Through a CAP, the facility revised the PREA policy to designated the Social Service Coordinator to monitor for retaliation. The facility also provided a revision of the coordinated response plan that included a step for responsibility to "Monitoring for Retaliation" to ensure this step was not omitted in the process. The facility also developed a form for monitoring inmates and a form for monitoring staff to properly demonstrate compliance and ensure each required stepped is covered in the monitoring process. Based upon the above actions, the standard is found in compliance.

The facility reported they had no allegations in the past year; therefore, there was no data to collect. The facility PREA policy contains language that supports the standard. They have a instrument to be completed (Allegation Reporting Form) when an allegation is made. This instrument does contain a set of definitions. This instrument could be used to answer questions from the DOJ survey if requested. No survey has been requested to date. The facility does not contract for the confinement of its residents.

Instructions for Overall Compliance Determination Narrative				

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

At the time of the on-site review, the agency/facility did not produce an annual report that assesses its effectiveness of sexual abuse prevention. With no annual report, it is unable to compare yearly data, or demonstrate the reports approval by the agency head or post such on the agency website. Through a CAP, the agency developed and provided an annual report that covers information/data from 2016-2017. The annual report provided addressed all components/sections in the standard. It included a section in the annual report for aggregated data and was signed by the agency head approving the report and posted on the agency website as verified by the auditor. The report provided brings the standard in compliance.

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

All data collected is secured in the corporate office of the PREA Coordinator and maintained for at least 10 years in accordance with records retention as supported in the interviews. As was noted in Standard 115.288, the aggregated data was made available by means of the annual report to the public through the agency website. There were no personal identifiers listed in the data. This action brings the standard in compliance.
